

Cool streets are quite famous...

the importance of well designed public spaces

Cities get greener

Adaptation/mitigation to climate change and to a pandemic go together

Mexico City is a good reference for Vienna as regards trees

Maybe more trees help to reduce water you need for "cool streets"?

Absolutely!

Tratschbankerl :)

green infrastructure has become a trending topic (also due to COVID19)
2nd that

The willingness by municipalities to invest in adjustments in response to pandemics.
We need to connect public spaces to the wellbeing of the city dwellers. Most people must have found some sanity being in the outdoor spaces.

The role of Cities when it comes to green infrastructure has become more prominent
