

Take-aways Connective Cities Event **Virtual Global Exchange on Municipal Response to COVID-19:**
Session "Smart schooling – Corona as a chance to bridge digital gaps" (25/11/2020):

- Digital skills is a priority.
- Teachers have become again our she-ros!
- It is incredibly interesting to see Paul sharing resources with Nadia.
- Cities have a great chance to tackle education challenges, they are the ones dealing face-to-face with citizens. We should explore this further :)
- Appreciating how well resourced we are in Europe
- Seeing the different solutions for different contexts in providing education for learners during this Covid 19 period
- How we can learn from each other. But in the end the funding and the infrastructure is the most important thing.
- I believe critical infrastructure is key, no matter where you are. And it is important now more than ever to share resources with those that can make great use of them.
- Devices are not enough! Neuroscience should be taken into account, how we learn, how much we can sit in front of a computer. Digital health today!
