

Welcome to the Connective Cities session 3  
on “Public Health & Crisis Management”

## Technical set-up

1. Please check your audio and video connection
2. Contact technical support if in need
3. For translation, use <https://app.interactio.io>  
(code CC2020)

# Virtual Global Exchange

Municipal Response to **COVID-19**

**NOV - DEC**  
**23<sup>rd</sup> 3<sup>rd</sup>**

Welcome to the “how-to” Workshop

# Decision Making and Communication in crises situations

Commissioned by

# The Team

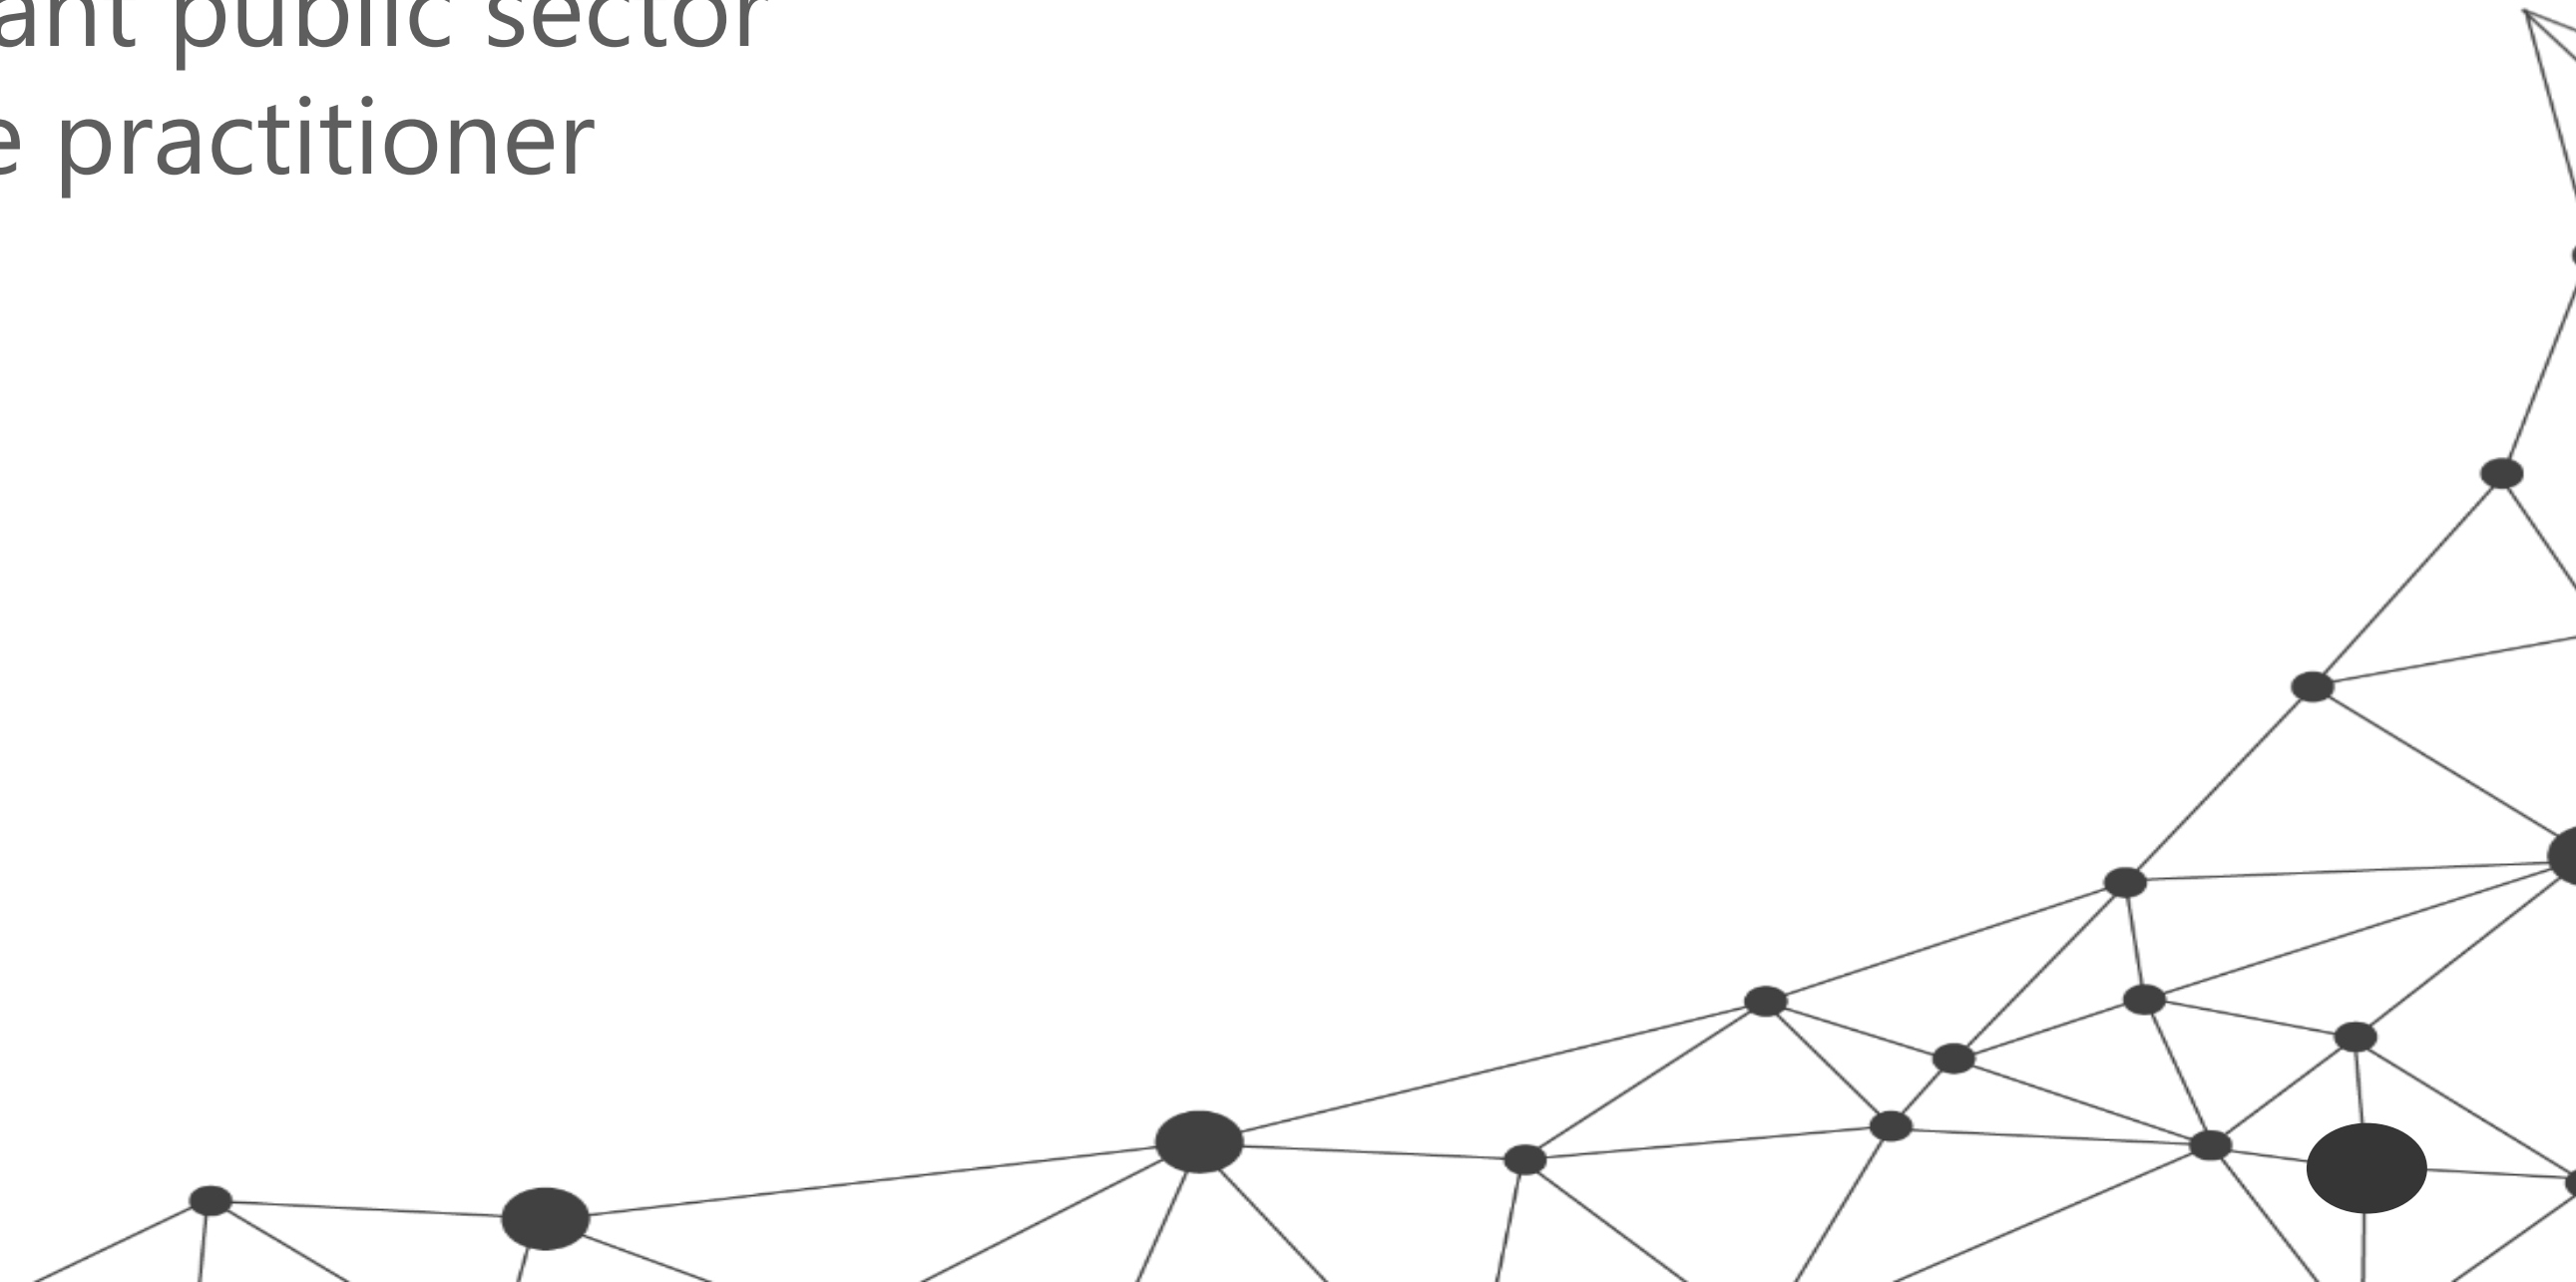

**Sandra Mandl**

certified systemic therapist (DGSF) and  
systemic consultant (GST)

**Felix Richter**

organizational consultant public sector  
somatic experience practitioner

# What you will learn in this workshop

- a) Understanding how FFFM-states affect us
- b) Limitations of rational thinking in situations with acute stress
- c) Applying the strategies to describe individual and collective coping behavior
- d) Recommendations for effective communication and decision-making

# Getting to know each other (using public chat)

Send message to Public Chat

1. Where are you from? city, country
2. What challenges are you facing during the pandemic?

# How to facilitate our communication

1. **Turn off your webcam**
2. **Mute yourself**
3. **Feel free to ask anytime** via the **chat function**
4. For **translation**, please use <https://app.interactio.io> and the code **CC2020** – also provided via chat.

# Workshop part I

## Foundation: Human reactions

# Fight / flight response

Aggressive behavior, massive fear

# Freeze / collapse response

Lack of response  
Silent colleagues and groups, crying

# Merging

Coping strategy in stress situations

# Social engagement

Human connection and rational decision making is possible

# The somatic sensations

# Stress reactions and the brain (simplified)

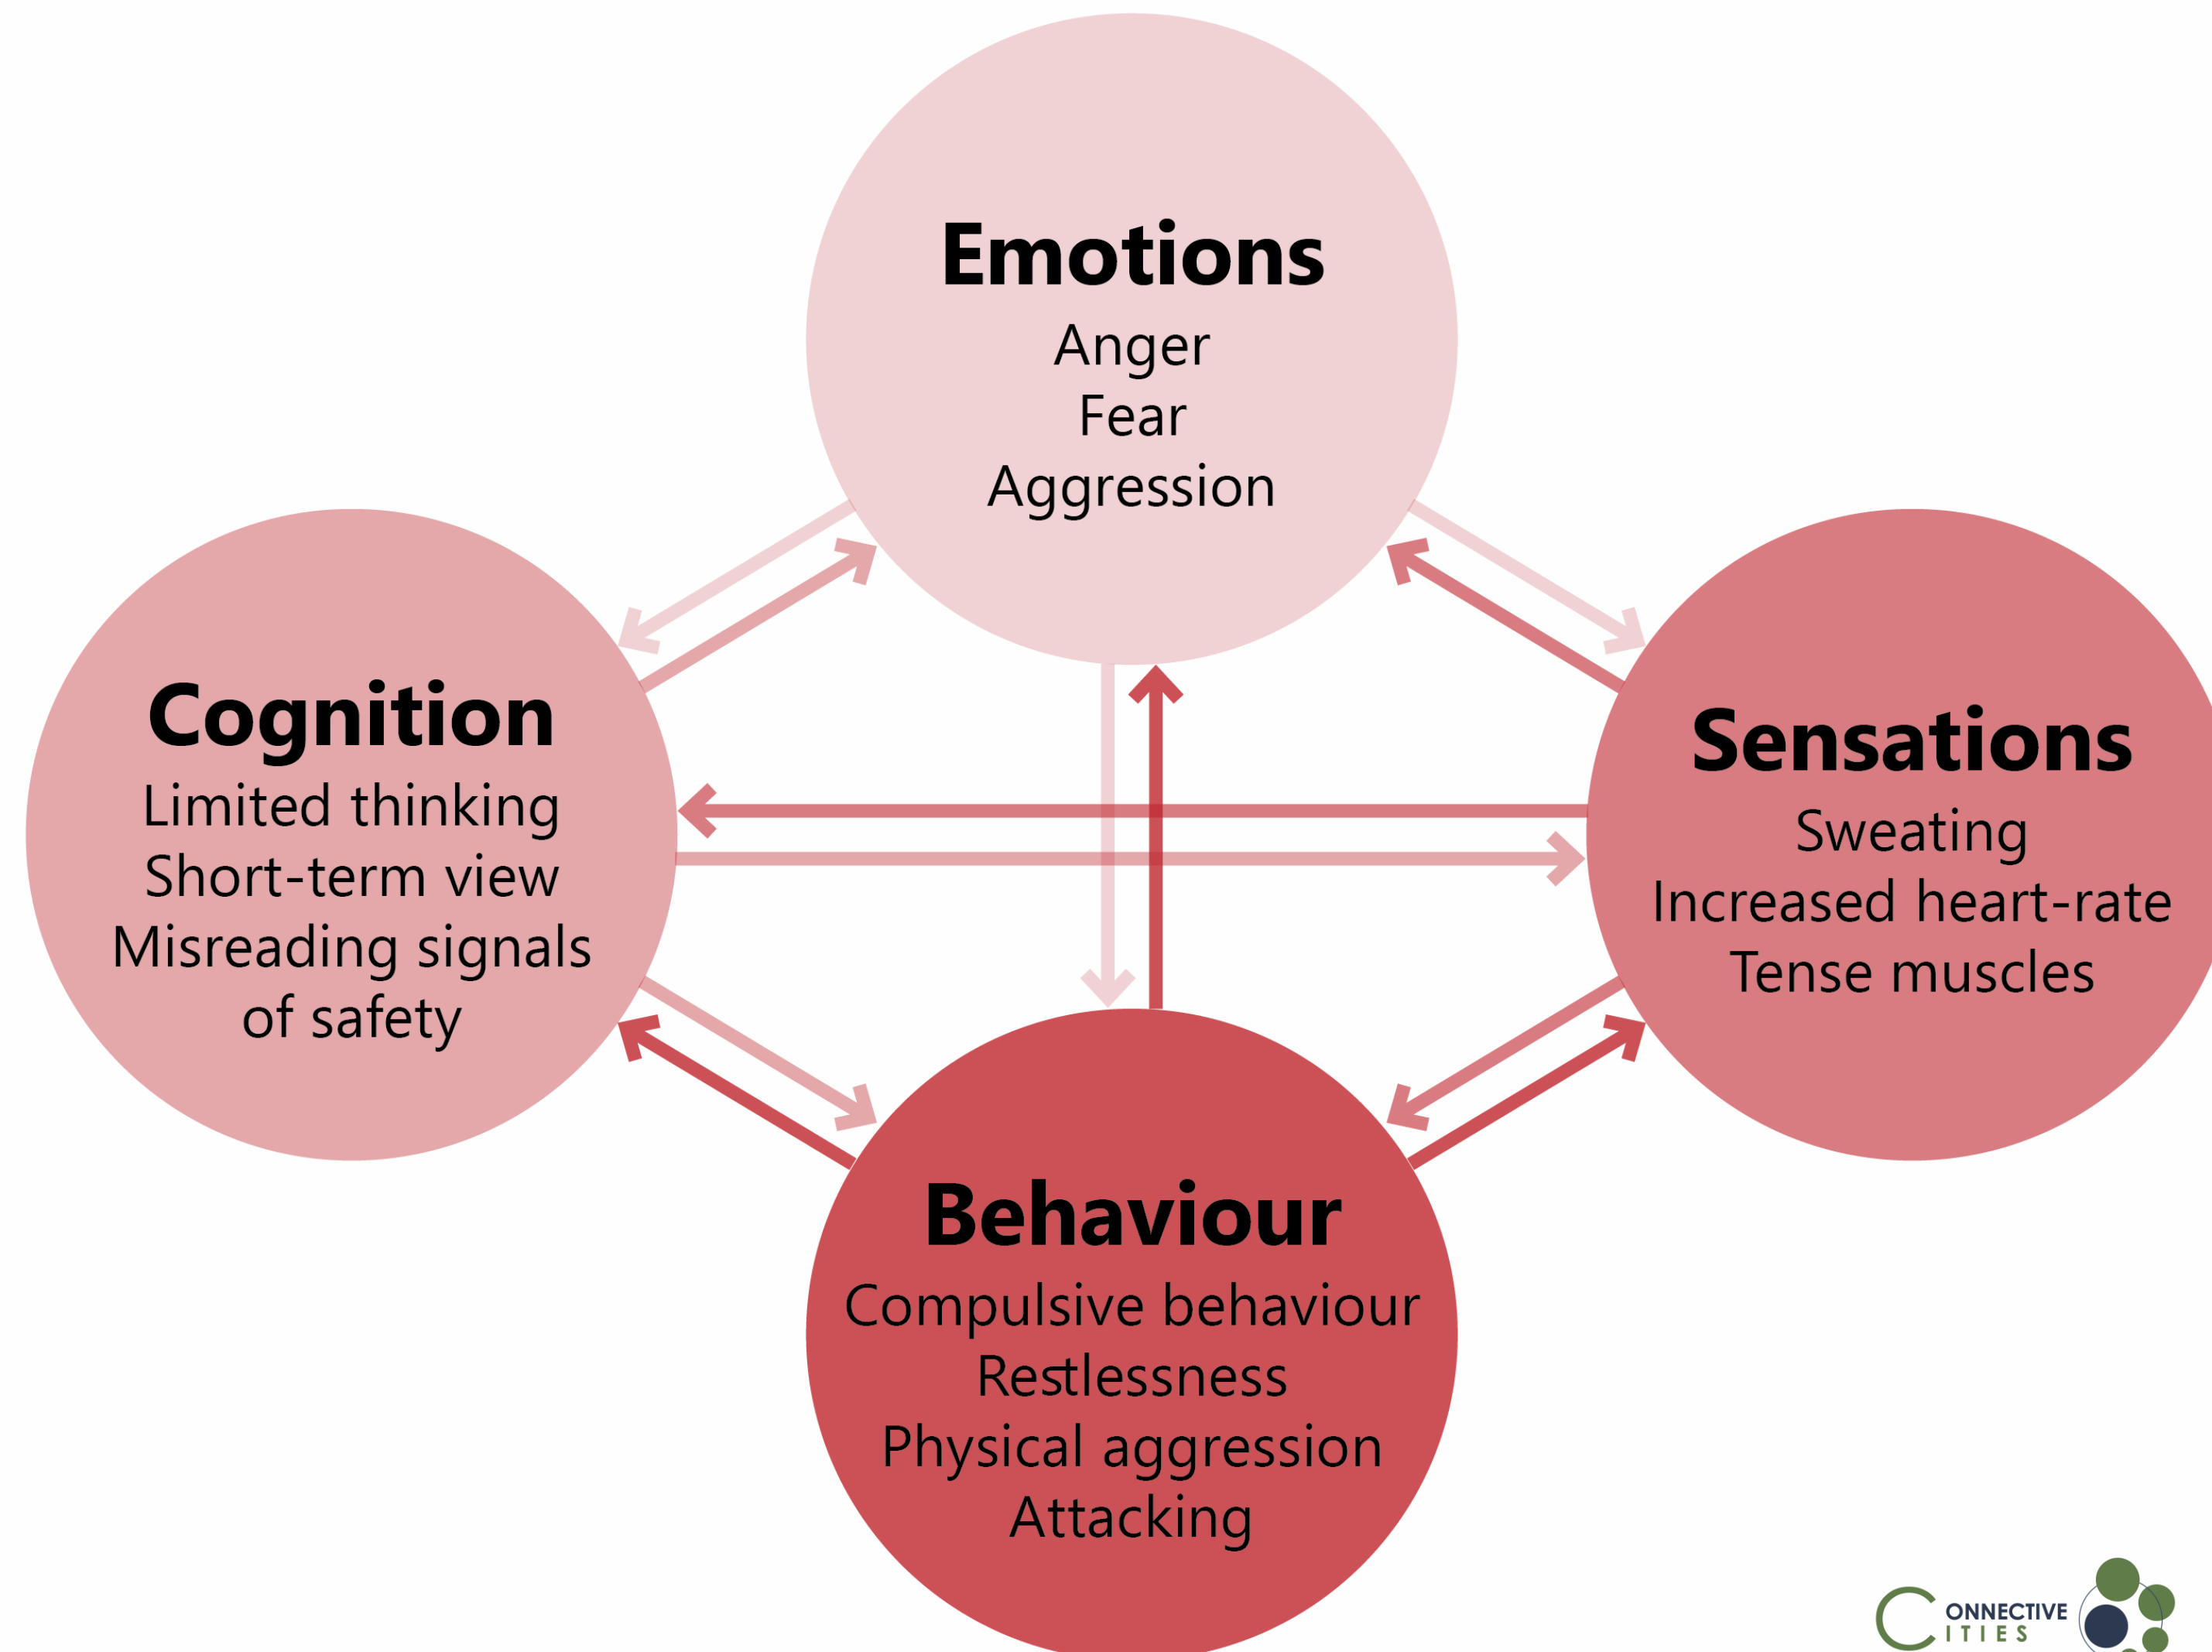

## Reaction examples

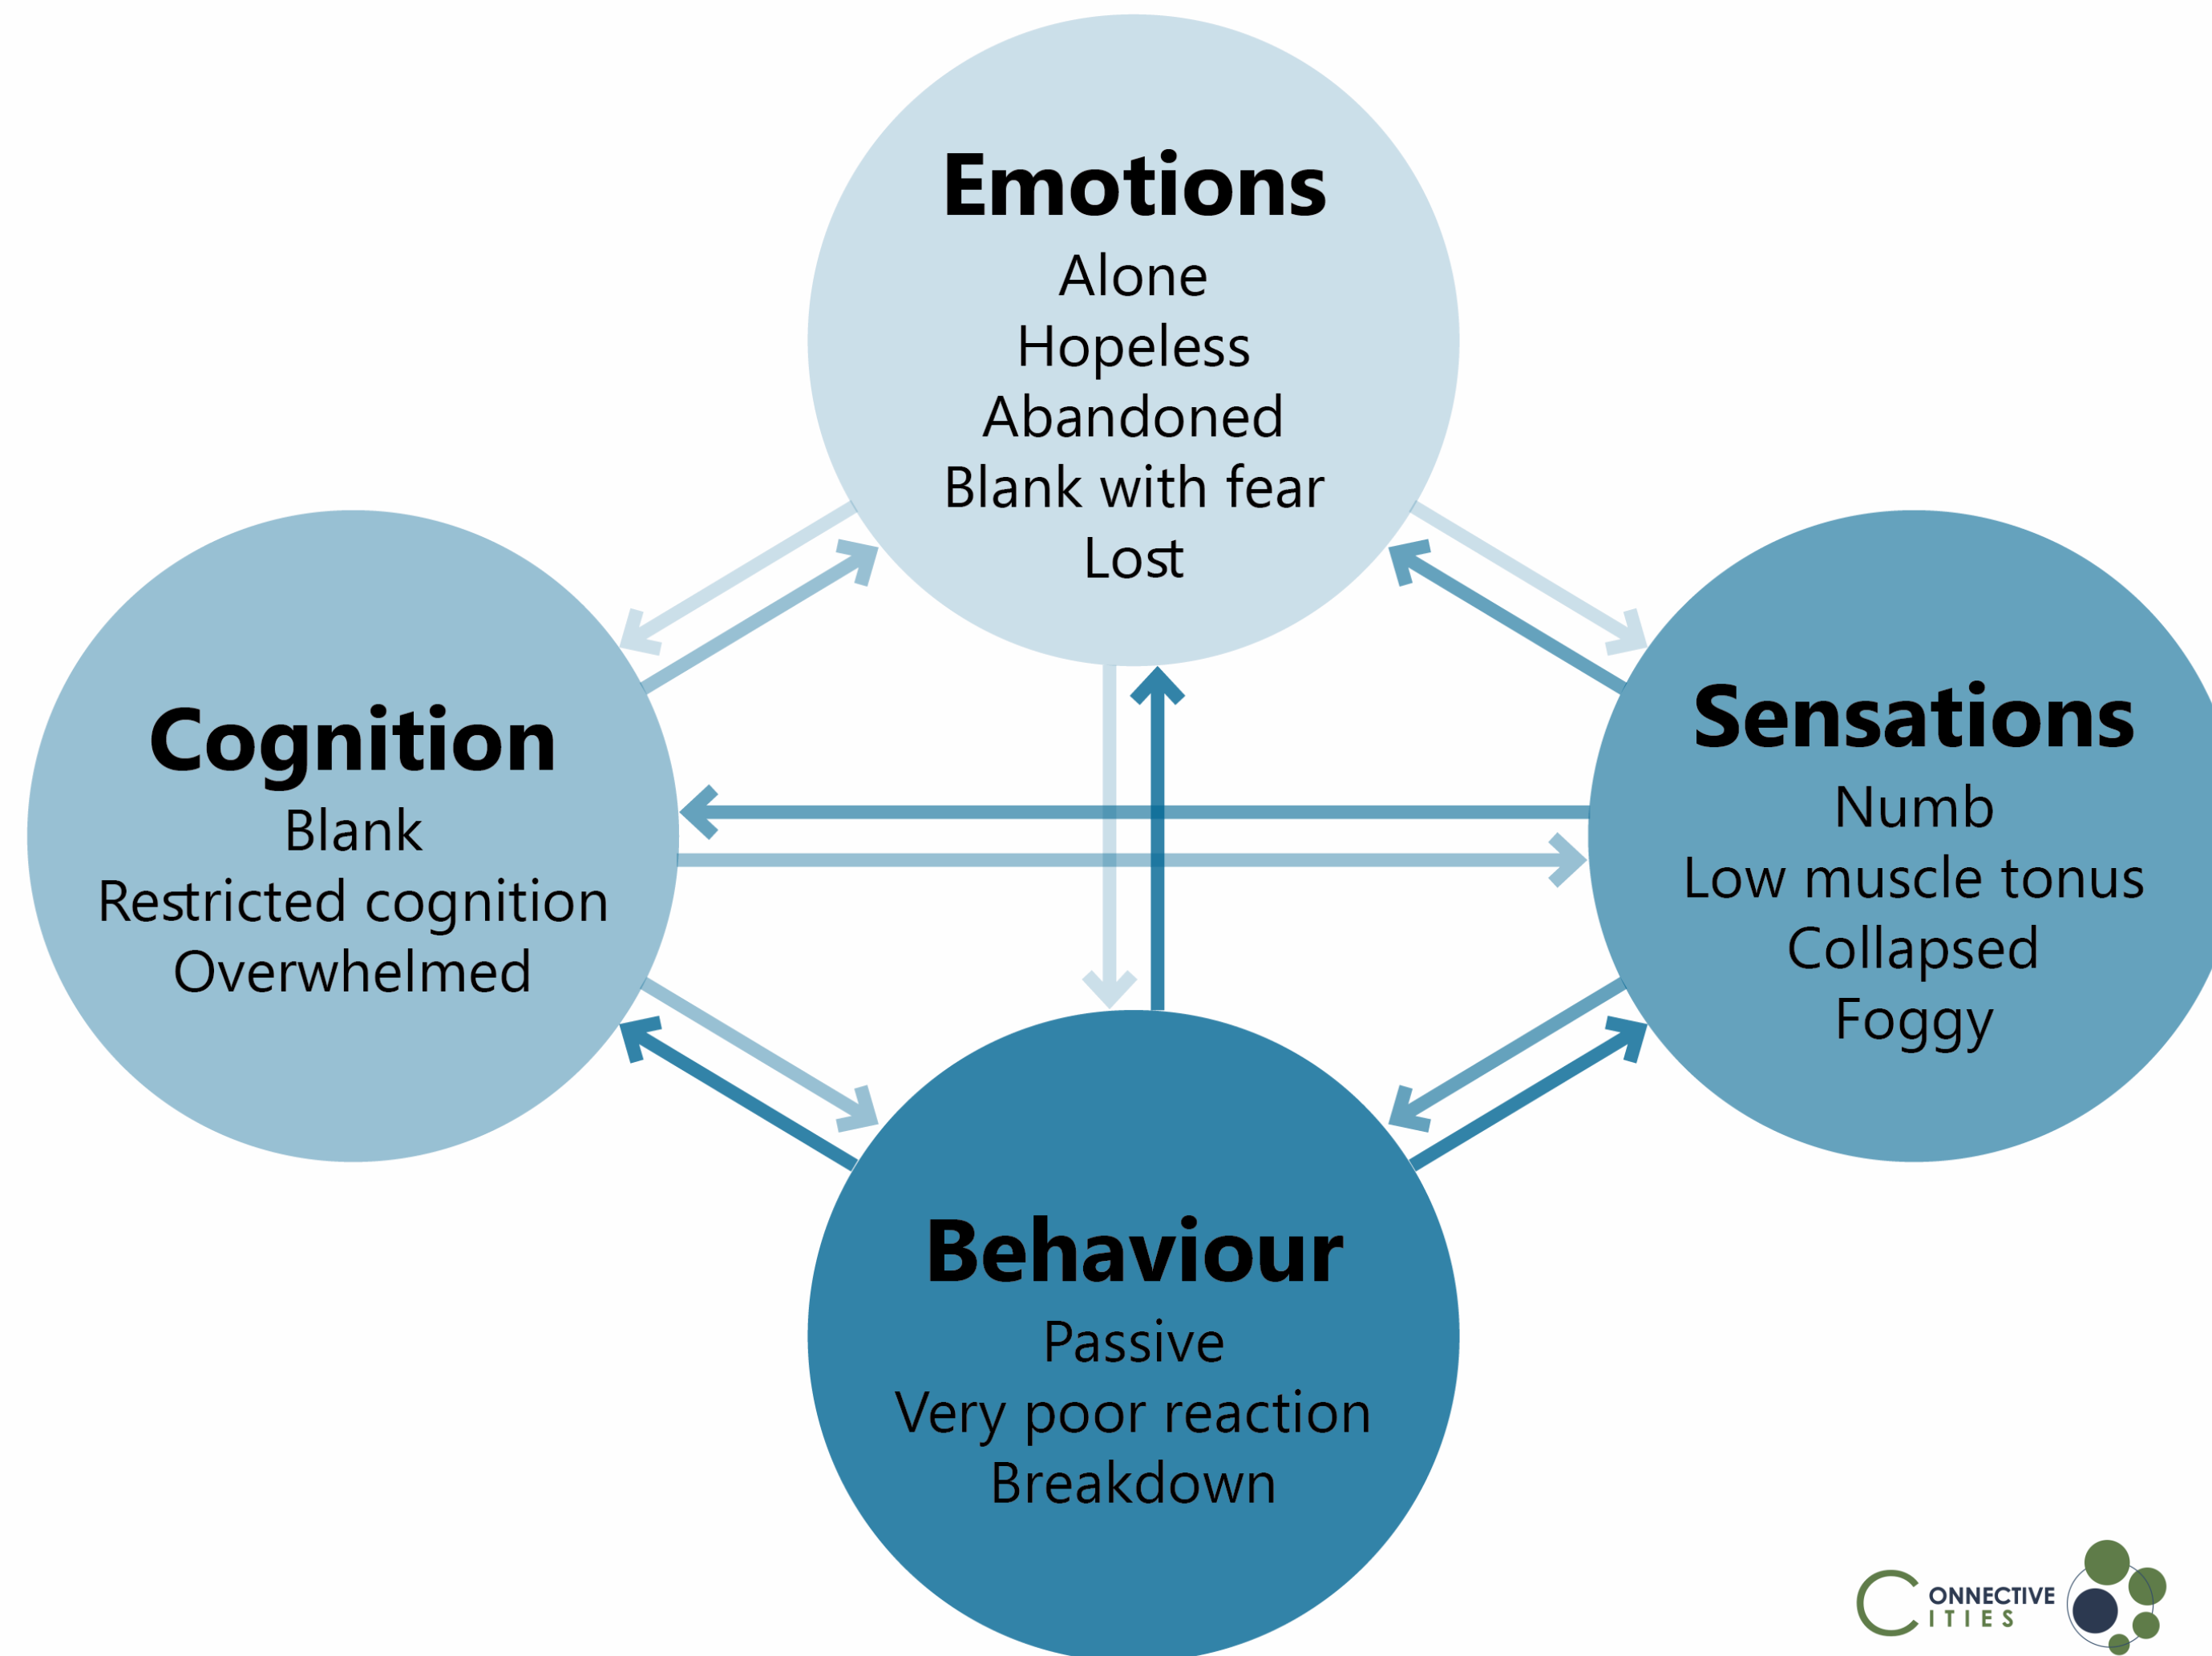

- Freeze / collapse: → „reptilian“ brain
- Fight / flight: → „mammalian“ brain
- Social engagement: → neocortex

# Reactions in fight / flight mode

# Reactions in Freeze / Collapse mode

# How the three nervous states play together and influence us

freeze/collaps

fight/flight

social engagement

# Q & A

- 1. Questions of understanding?**
- 2. Which observations have you made with the described states?**

# Workshop part II

## Recommendations for communication & decision making

# Different levels of interaction

# Recommendation 1: Dealing with Fight / Flight / Freeze / Merge (FFFM) reactions

Based on the model, you will be able to deal more effectively with stress reactions and react in a more functional way

Be aware that in a FFFM reaction, thinking is slowed down.  
**Communicate with short, clear sentences.**

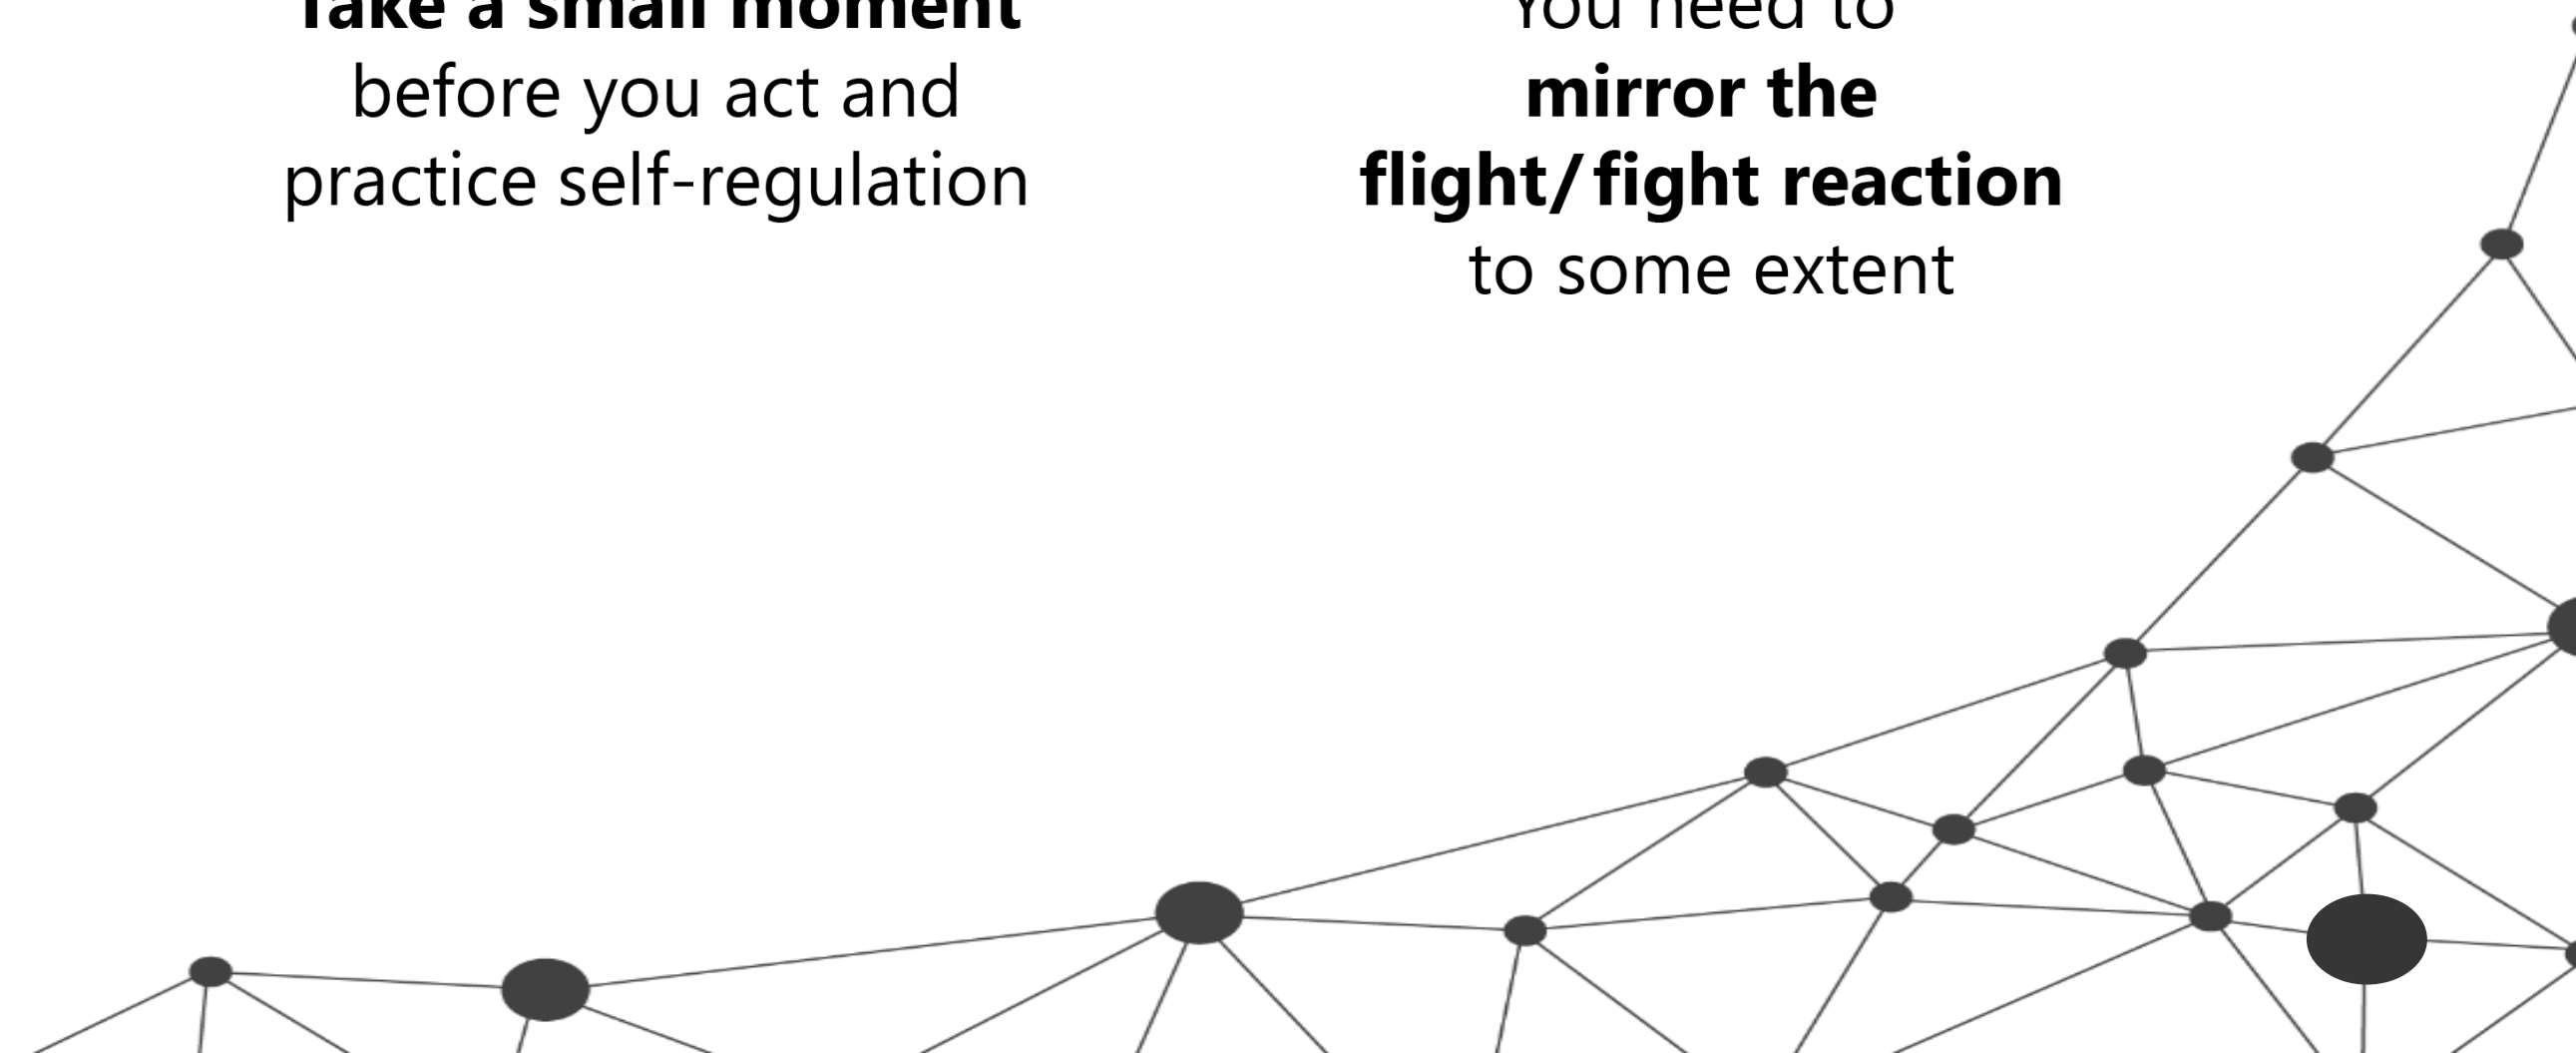

Make sure you send **signals of safety** and – if possible – create a safer environment

**Take a small moment** before you act and practice self-regulation

You need to **mirror the flight/fight reaction** to some extent

## Recommendation 2: Measures on organizational level for effective decision making

Groups also get in the three states of freeze, flight/fight and social engagement.  
What can be done as e.g. crises manager?

Determine  
**leadership and team roles**  
ASAP (for orientation)

Provide simple clear  
**rules**  
(for orientation)

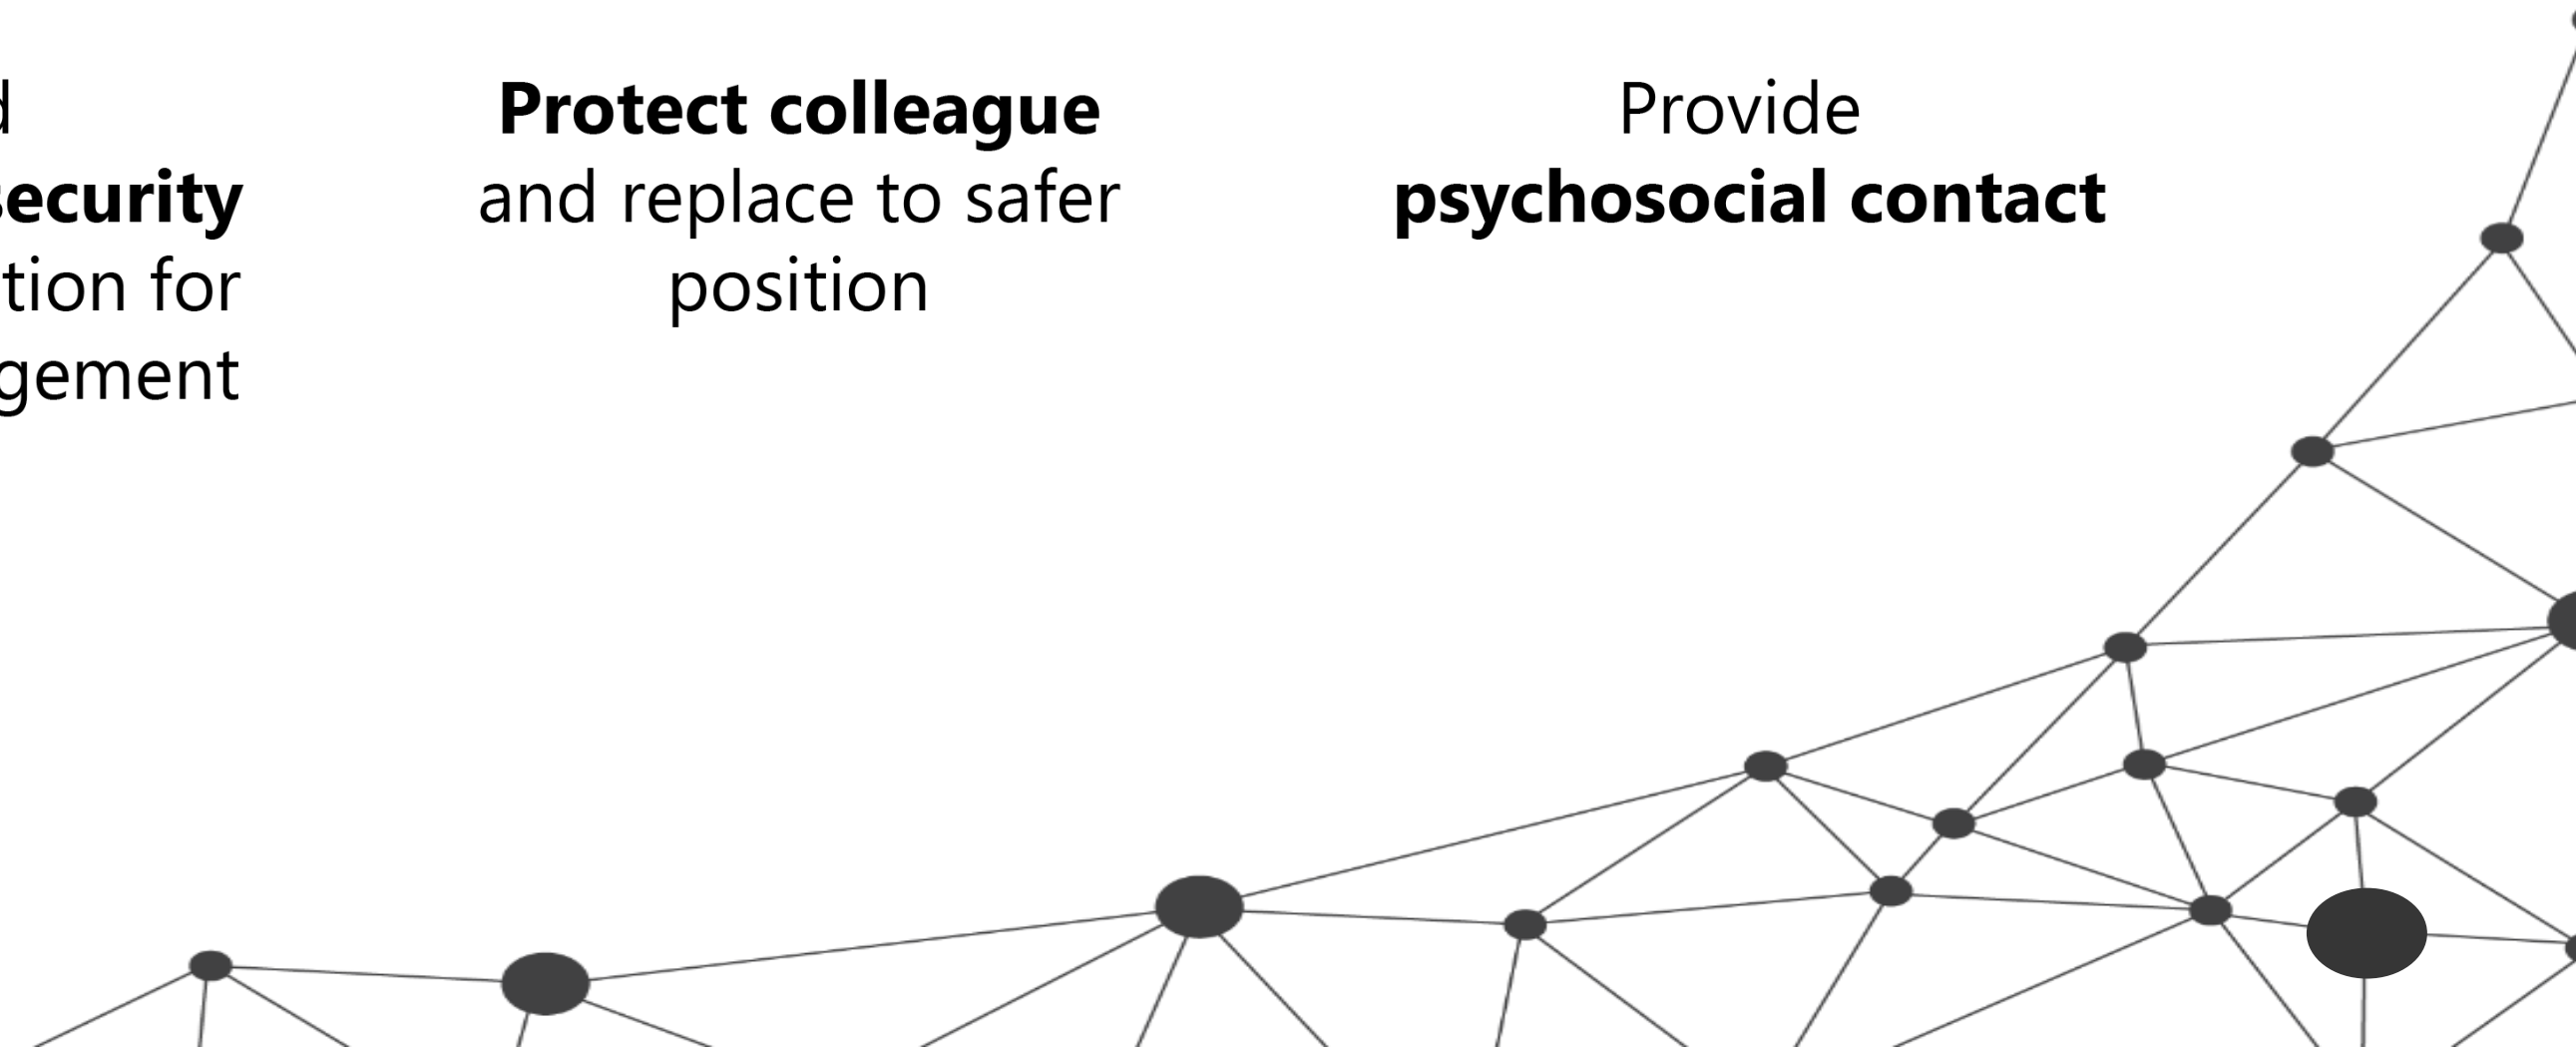

Send  
**signals of security**  
and connection for  
social engagement

**Protect colleague**  
and replace to safer  
position

Provide  
**psychosocial contact**

## Recommendation 3: **Be aware of groupthink!**

With high external pressure, there is the danger of "Groupthink":  
ingroup vs. outgroup and desire for harmony leads to irrational decisions

What can be done?

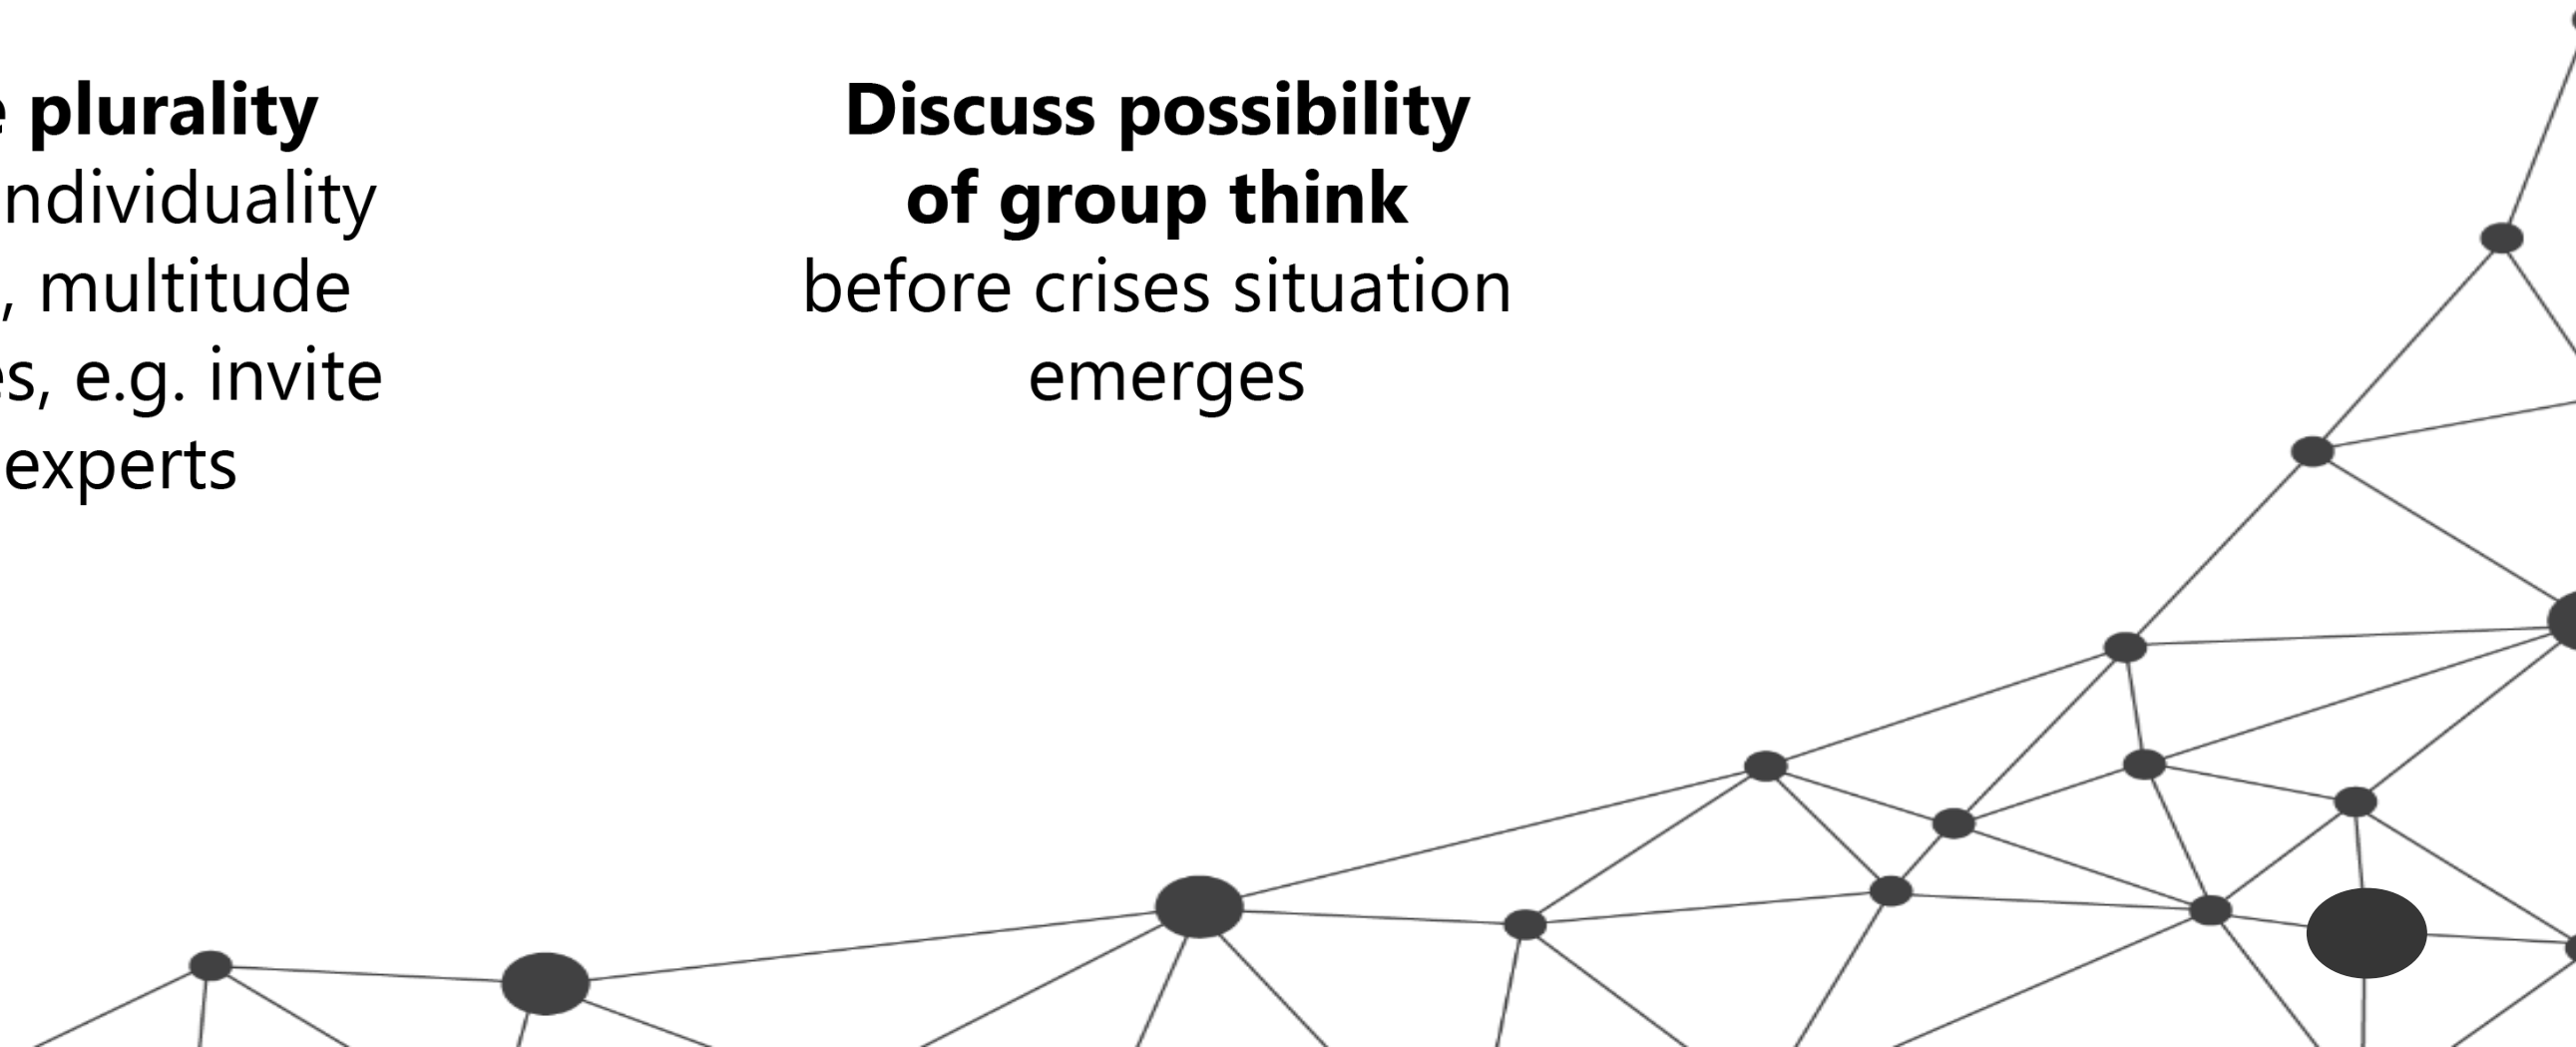

**Note activated  
(flight/fight/merge) state**  
and be aware of possible  
irrational decisions and  
**send signals of security**

**Encourage plurality**  
by stressing individuality  
of members, multitude  
of alternatives, e.g. invite  
external experts

**Discuss possibility  
of group think**  
before crises situation  
emerges

## Recommendation 4: **Ensure self-regulation**

We can „self regulate“ and thus stay connected with the group and „in control“ of our reactions. The most effective activities include

**Social  
engagement**

**Body Scans**

Conscious  
**Breathing and physical  
exercises**

**Compare your feeling  
of danger to the  
as-is situation**

# Summary of the recommendations

We can „self regulate“ and thus stay connected with the group and „in control“ of our reactions. The most effective activities include

1. Deal pro-actively with Fight / Flight / Freeze / Merge (FFFM) reactions
2. Take organizational measures for effective decision making
3. Be aware of groupthink!
4. Ensure self-regulation

# Thank you very much!

<b>Wednesday, 25<sup>th</sup> Nov</b>	Economic Response, Housing & Education	10:00 – 12:00 parallel sessions	1. Development agencies in times of Corona - Private sector initiatives 2. Tourism Sector addressing the Pandemic - Working with Local Municipalities
		14:00 – 16:00 parallel sessions	1. Municipalities and their COVID-19 Response to Local Economic Development 2. Smart schooling – Corona as a chance to bridge the digital divide
		16:30 – 18:30 parallel sessions	1. Urban Poverty and Living Conditions: Limiting COVID-19 Impacts in Densely Populated Backyard Rental Areas 2. Cooperation between administration and schools in times of Corona
