Global Initiative on
Disaster Risk Management

Partners of Connective Cities

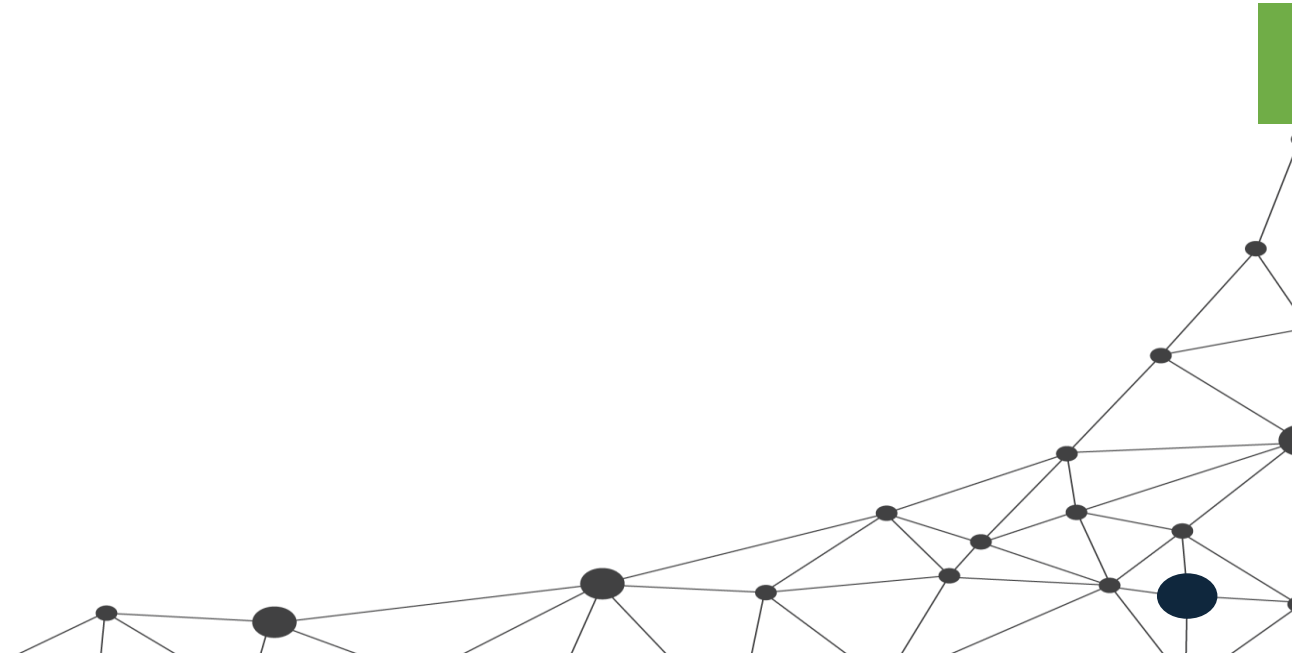

Commissioned by

Key discussion points from Scoping Part 1 (16.03)

- Core elements of preparedness
 - Co-operation with governance structures and various stakeholders.
 - Building information, early warning and communication systems.
 - Securing funding into long-term solutions.
- Importance of Nature-based solutions
 - Opportunities for low adaptation, flood warning, retention and co-operation.
 - Transformative river management programs, hydraulic models and notification of forecasted events.
- Case study – Addressing floods in Durban, South Africa

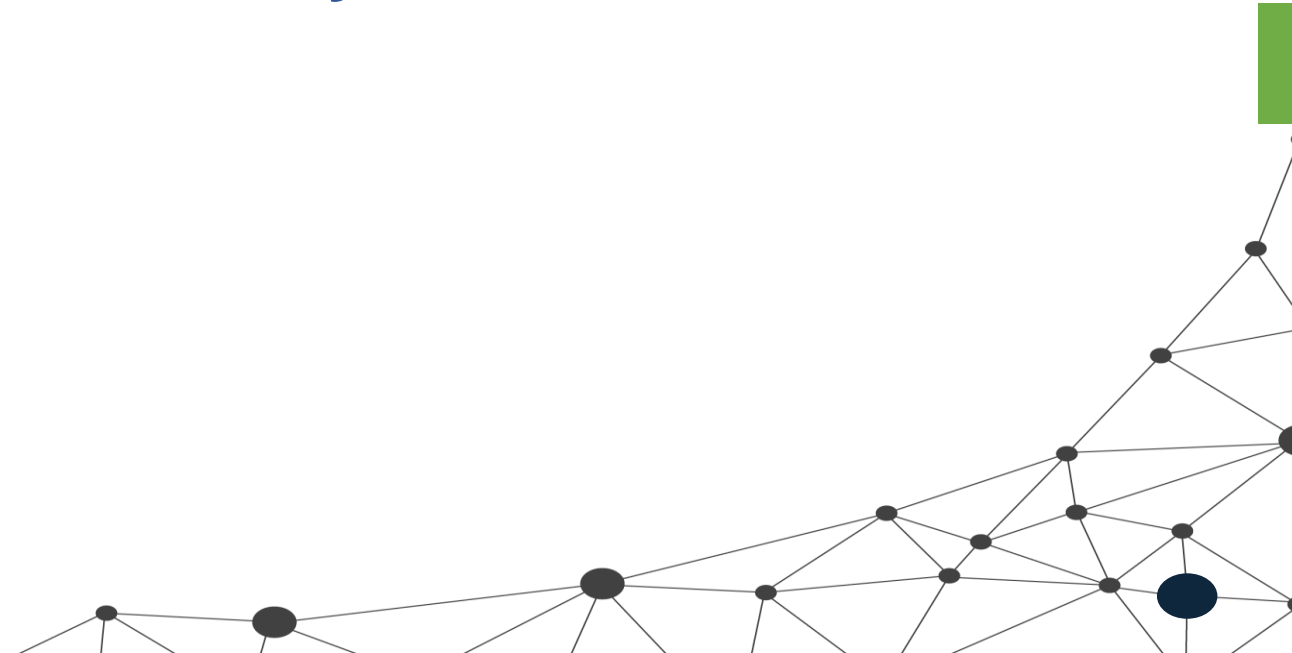

Home-fun exercise

Guiding questions

- What is the problem and what are the threats stemming from a hazard?
- Which stakeholders think such hazard(s) are a problem? | Mapping institutional organigram and interconnections.
- Which legal institutions or governance structures are in place?
- Why do you and stakeholders think this hazard is a cause of concern?
- What are the available sources of funding, resources, and capacities?
- What proposed actions can mitigate the hazard?
- Is there reliable data and enough time to prepare for the next hazard?

Questions of clarity?

Thank you very much for your attention!
