# Challenges in the Urban Ecosystem

## Citizens

- Lack of Citizen centric processes;
- Limited and inequitable access to online citizen service delivery.

## Municipal Employees

- Weak Capacity / technical competence leading to procurement, delivery & adoption challenges;
- Over dependence on few select staff / external consultants for day-to-day functioning and lack of innovation.

## Elected Representatives

- Low visibility on current implementation status of various projects/schemes.

## State Government Officers

- Data lies in silos and lack of intelligent data across systems and departments to tap revenue potential / cost optimization and to drive responsive governance.

## Business and Industry

- Use of local, non scalable point solutions / proprietary systems leading to issues of vendor lock-ins, time & cost escalations, duplication of effort and resources, obsolete products.

# Need to enhance Digital Urban Service Delivery

# National Urban Digital Mission (NUDM)

A mission to support digitization of urban citizen services using shared digital infrastructure across the country.

- Mission launched in **Feb 2021** (₹ 96.5 Cr)
- **No funding** to States /UTs for rollout of eGovernance.
- **31 States/ UTs** have **signed MOUs** post detailed engagement and as-is analysis.
